

8005210 740

APR 7 1980

Docket Number 50-397

MEMORANDUM FOR: D. Thompson, Executive Officer for
Operations Support

FROM: H. D. Thornburg, Director
Division of Reactor Construction Inspection

SUBJECT: WPPSS, WNP-2 ENFORCEMENT PACKAGE

We have reviewed the subject material and have the following comments.

- The inspection report appears to adequately support the citations.
- We note that citations are primarily against Appendix B and implementing procedures. Some may believe that closer ties to the SAR or other specific licensee commitments should be developed. We believe that direct ties to NRC regulations form the strongest basis for enforcement action.
- We note that although there are many citations, and many examples within some of the citations, the total dollar amount is not large, for such obvious overall QA/management problems. You may wish to consider expanding some of the "examples" into separate citations.

Harold D. Thornburg, Director
Division of Reactor Construction
Inspection
