

Washington Public Power Supply System  
A JOINT OPERATING AGENCY

P.O. BOX 968 3000 GEO. WASHINGTON WAY RICHLAND, WASHINGTON 99352 PHONE (509) 372-5000

March 20, 1981  
G02-81-63

Docket No. 50-397

U. S. Nuclear Regulatory Commission  
Office of Nuclear Reactor Regulation  
Washington, D.C. 20555

Attention: Mr. B. J. Youngblood, Chief  
Licensing Branch 1  
Division of Licensing

Gentlemen:

Subject: WPPSS NUCLEAR PROJECT NO. 2  
UPGRADED EMERGENCY PLANS FOR  
WASHINGTON PUBLIC POWER SUPPLY SYSTEM  
PROJECT 2

- Ref.:
- 1) Letter, D. L. Renberger to D. B. Vassallo, "Upgraded Emergency Plans," dated December 31, 1979.
  - 2) Letter, D. F. Ross to D. L. Renberger, same subject, dated April 12, 1980.

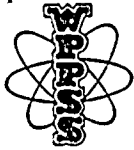

The Washington Public Power Supply System is providing twelve (12) copies of the WNP-2 Emergency Preparedness Plan (Hanford Site) for your review (ten to NRR and two to I&E). These are advance copies and will be replaced with official copies in a formal FSAR amendment when they are printed. No changes in content will be made. These initial copies are being sent to meet the Supply System commitment to submit an emergency plan in March 1981. The March date was agreed to by the Supply System and NRC in references 1 and 2. Additionally, a topical manual approach was approved in Reference 2 for all three Hanford plants allowing consolidation of the three emergency plans (WNP-1, 2, and 4) into one document.

## Washington Public Power Supply System

B. J. Youngblood  
Page 2

The commitments in this Emergency Plan are based on WNP-2 operating and WNP-1/4 under construction. Future revisions will be made to include WNP-1 and WNP-4 as operational and will meet the FSAR submittal dates for those plants.

The Emergency Plan describes a permanent Onsite Technical Support Center and Nearsite EOF. These facilities may not be completed prior to the pre-fuel load drill. Provisions are therefore being made for temporary facilities to verify the workability of the Emergency Plan. Other features, procedures, and identified commitments in the plan are intended to be in place by the time of the drill.

Please contact our licensing engineer, Mr. O. K. Earle (509-372-5000, extension 2310) if you have any questions.

Very truly yours,

G. D. Bouchey  
Director, Nuclear Safety
