Docket No. 50-397

Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

Subject: NUCLEAR PROJECT NO. 2
SAFETY EVALUATION REPORT, CONFIRMATORY
ISSUE 12, OVERHEATING OF GADOLINIA FUEL PELLETS

References: 1) Letter, G02-83-1058, same subject, dated
November 15, 1983
2) NUREG-0892, WNP-2 Safety Evaluation Report, dated
March 1982 - 4.2.3.2(4)

Per a telephone conversation on November 16, 1983, between Mr. R. Auluck (NRC), Mr. J. Ogilvie (NRC) and Mr. B. Pogue (Bechtel), the referenced letter is amended as follows:

Reference 2) stated that General Electric document NEDE-20943-P was being reviewed to satisfy the subject confirmatory issue. Subsequently, General Electric withdrew NEDE-20943-P because of improvements in the General Electric thermal-mechanical model. In replacement of NEDE-20943-P, General Electric submitted NEDE-23785-1-P, Appendix B as addressing this subject (approved by NRC) and General Electric has confirmed that the applicable limits for overheating of gadolinia fuel pellets remain valid.

This General Electric document, Appendix B, is applicable to WNP-2 and is the basis for considering the subject issue closed. Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
