The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The primary data was gathered through direct observation and interviews, while secondary data was obtained from existing reports and databases.

The third part of the document details the results of the analysis. It shows that there is a significant correlation between the variables being studied. The data indicates that as one variable increases, the other also tends to increase, suggesting a positive relationship.

Finally, the document concludes with a summary of the findings and some recommendations for future research. It suggests that further studies should be conducted to explore the underlying causes of the observed trends and to test the hypotheses in different contexts.

The following table provides a summary of the key data points from the study. It shows the average values for each variable and the range of the data. This information is crucial for understanding the overall trends and for comparing the results with previous studies.

Variable	Mean	Standard Deviation	Range
Variable 1	12.5	3.2	8.0 - 17.0
Variable 2	15.8	4.1	10.0 - 20.0
Variable 3	18.2	5.0	12.0 - 23.0

The data clearly shows that the variables are positively correlated. For example, when Variable 1 is high, Variable 2 and Variable 3 are also likely to be high. This relationship is supported by the statistical analysis and the visual representation of the data.

In conclusion, the study has provided valuable insights into the relationship between the variables. The findings suggest that there is a strong positive correlation, and this has important implications for the field of study. Further research is needed to fully understand the mechanisms behind these relationships.

Docket No. 50-397

Ms. R. M. Diggs
Facilities Program Coordinator
License Fee Management Branch
Office of Administration
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

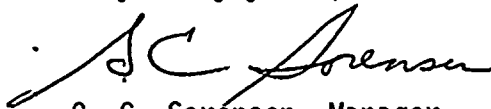

Dear Ms. Diggs:

Subject: NUCLEAR PLANT NO. 2
REMITTANCE OF APPLICATION FEE FOR
LICENSEE EVENT REPORT EXEMPTION REQUEST

- References:
- 1) Letter, R. M. Diggs (NRC) to G. C. Sorensen (SS), Same Subject, dated March 13, 1985
 - 2) Letter, G02-85-093, G. C. Sorensen (SS) to A. Schwencer (NRC), "Licensee Event Report Exemption Request", dated February 20, 1985

As requested in Reference 1, attached is a warrant in the amount of \$150.00 as initial payment for the exemption request forwarded in Reference 2. Should you have any further questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
