

JUL 27 1990

Docket No. 50-397

Washington Public Power Supply System  
P. O. Box 968  
3000 George Washington Way  
Richland, Washington 99352

Attention: Mr. G. C. Sorensen, Manager  
Regulatory Programs

Gentlemen:

By memorandum dated July 5, 1990, the Federal Emergency Management Agency (FEMA) informed the NRC of the results of their observations of the offsite activities during the WNP-2 emergency preparedness remedial drill on April 3, 1990. The memorandum states that the previous deficiency was closed; therefore, FEMA now has reasonable assurance that the public health and safety can be adequately protected in the event of an accident at WNP-2. Copies of the FEMA memorandum and report are enclosed.

The FEMA report identifies five areas requiring corrective actions. We request that you coordinate with the offsite authorities to ensure corrective actions are taken to resolve these areas.

Sincerely,

John P. Roberts, Acting Chief  
Safeguards, Emergency Preparedness &  
Non-power Reactor Branch
