Docket No. 50-397

9203120326 920302 PDR ADDCK 05000397 PDR PDR

Mr. G. C. Sorensen, Manager Regulatory Programs Washington Public Power Supply System 3000 George Washington Way P.O. Box 968 Richland, Washington 99352

Dear Mr. Sorensen:

SUBJECT: RESPONSE TO GENERIC LETTER 91-11, "RESOLUTION OF GENERIC ISSUES 48 'LCO'S FOR CLASS 1E VITAL INSTRUMENT BUSES,' AND 49,'INTERLOCKS AND LCO'S FOR CLASS 1E TIE BREAKERS,' PURSUANT TO 10 CFR 50.54(f)" FOR WASHINGTON PUBLIC POWER SUPPLY SYSTEM NUCLEAR PLANT NO. 2 (TAC NO. M82488)

On July 18, 1991, the NRC issued Generic Letter (GL) 91-11 which contained the staff resolution of Generic Issues 48 and 49. The GL required that licensees certify that procedures exist that contain time limitations and surveillance requirements for vital instrument buses (VIB), inverters or other onsite power sources for VIB, and tie breakers. If procedures do not exist, a justification demonstrating the reasons why the controls are not needed is required.

By letter dated December 5, 1991, you responded to the GL. You indicated that procedures for time limitations and surveillance requirements are in place at your site.

The staff has reviewed your response and finds that it meets the reporting requirements set forth in GL 91-11. This completes the staff's activities on TAC No. M82488.

Sincerely,

Original signed by

Patricia L. Eng, Project Manager Project Directorate V Division of Reactor Projects III/IV/V Office of Nuclear Reactor Regulation
