Re: Amendment to NRC License No. 21-00338-02
Hurley Medical Center

Dear Madam or Sir:

We need to amend our Materials License #21-00338-02 by changing our Radiation Safety Officer from Dr. Ege to Dr. Bansal.

Dr. Bansal is currently an authorized user on our license and we have attached NRC Form 313a(RSO) and the Delegation of Authority to Dr. Bansal as RSO.

Thank you for your assistance with this matter. Please contact Yuwonia Speights, Director of Radiologic Services(YuwoniaSpeights@hurleymc.com) or our consultant, Tracy King, at 734-662-3197 (tking@mpcphysics.com) if you have any questions concerning this matter.

Sincerely,

Amy Benko, V.P. for Patient Care Services

RECEIVED OCT 18 2017

HURLEY MEDICAL CENTER
MEMO

To: Dr. Bansal, Nuclear Medicine Radiation Safety Officer

From: Melany Gavulic, CEO & President

Subject: Delegation of Authority

You, Dr. Bansal, have been appointed Radiation Safety Officer for the Nuclear Medicine Department at Hurley Medical Center and are responsible for ensuring the safe use of radiation. You are responsible for managing the Radiation Protection Program, identifying radiation protection problems; initiating, recommending, or providing corrective actions, verifying implementation of corrective actions; stopping unsafe activities; and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations where justified to maintain radiation safety. You are required to notify management if staff does not cooperate and does not address radiation safety issues. In addition, you are free to raise issues with the Nuclear Regulatory Commission at any time. We currently contract Medical Physics Consultants, Inc. to assist with radiation safety oversight, therefore, it is estimated that you will spend no more than 1-2 hours per week overseeing our radiation safety program.
