SUBJECT: NRC INSPECTION REPORT 50-397/94-26

This refers to the inspection conducted by Messrs. T. O. McKernon and M. E. Murphy of this office and a human factors consultant on November 28 through December 2, 1994. The inspection included a review of activities authorized for your Washington Nuclear Project-2 facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection included the emergency operating procedures, the licensed operator requalification training program, and the administration of a licensed operator examination. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, observation of activities in progress and the administration of an operating test using the plant-specific simulator. The results of this inspection are documented on pages 1-3, in the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Gwynn", written over a typed name and title.

Thomas P. Gwynn, Director  
Division of Reactor Safety
