SUBJECT: NRC INSPECTION REPORT 50-397/94-32

This refers to the inspection conducted by Mr. R. C. Barr and inspectors identified of this office on October 30 through December 10, 1994. The inspection included a review of activities authorized for your Washington Nuclear Project-2 facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented in the enclosed report.

We are encouraged with the improvements the Supply System has achieved in the thoroughness and effectiveness of Quality Assurance audits and recent event assessments. We also note the progress being made in control room professionalism and urge your continued attention to each of these important areas.

One non cited violation was identified involving improper manipulation of a control rod and this was in violation of 10 CFR Part 50, Appendix B. This violation is not being cited because the criteria in paragraph VII.B.1 of Appendix C to 10 CFR Part 2 of the NRC's "Rules of Practice" were satisfied. This violation indicated inattention to detail by your operators. This issue was recognized and corrected by your staff. In addition, our inspectors identified that a senior licensed operator had entered the incorrect limiting condition for operation in a status log. The error existed through three shift turnovers prior to discovery by the inspector. Although this most recent issue was not safety significant, your continued attention towards improving operator attention to detail and implementation of the Technical Specifications is encouraged.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
