SUBJECT: NRC INSPECTION REPORT 50-397/95-17

This refers to the inspection conducted by Mr. F. R. Huey of this office on April 11 - 14, 1995. The inspection included a review of activities authorized for your Washington Nuclear Project-2 facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented in the enclosed report.

This inspection specifically reviewed the Supply System's employee concern program (i.e., the Nuclear Safety Issue Policy/Direct Line Program) to determine the effectiveness of previous management actions to address the weaknesses identified in NRC Inspection Report, dated January 12, 1994. Although the weaknesses were found to have been appropriately addressed, additional management attention is needed to ensure that all personnel are aware of the program and to reinforce your commitment to a discrimination-free work environment.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A handwritten signature in cursive script, appearing to read "A. Bill Beach".

A. Bill Beach, Director
Division of Reactor Projects
