SUBJECT: NRC INSPECTION REPORT 50-397/95-23

This refers to the inspection conducted by Mr. Gilbert L. Guerra, Jr., of this office on July 17-20, 1995. The inspection included a review of activities authorized for your Washington Nuclear Project-2 facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report. The disposition of the notification made to the NRC on July 12, 1995, regarding radioactive material found in the spray pond drain field trench, was discussed during a telephone conversation on August 9, 1995, between Mr. W. Kiel of your staff and Mr. G. Guerra of this office.

Areas examined during the inspection are identified in the report. These included the radiological environmental monitoring program. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented in the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Ross A. Scarano
for Ross A. Scarano, Director
Division of Radiation Safety
and Safeguards
