RE: Palo Verde Nuclear Generating Plant  
Units 4 and 5

Gentlemen:

Recent newspaper articles in the El Paso area have indicated that the El Paso Electric Company along with other partners in the Palo Verde Nuclear Plant are applying to your organization for permits for units 4 and 5.

As Mayor of El Paso, I wish to protest the granting of any additional permits in the Palo Verde program. The rate payers of El Paso have been saddled by the Texas Public Utility Commission with responsibility for construction work in progress.

Our utility bills are going to be so disproportionate as a result that the viability of our community to attract industry and provide our citizens with a quality life style will be greatly hampered.

I would appreciate notice of any hearing you have on this matter so that the City of El Paso can make an appearance as an intervenor or file a written statement of position.

Sincerely,

*Ray Salazar*  
RAY SALAZAR  
Mayor

DOCKET NUMBER

PROD. & UTIL. EAC, 50-528-530

The Honorable  
Joseph Hendrie, Chairman  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Dr. Hendrie:

I have received a letter from one of my constituents, Mr. David A. Lewis, which raises questions about the adequacy of the assessment of the seismic hazard at the site of the Palo Verde Nuclear Project.

As I have indicated previously, I recognize the complexity of the seismic question. However, this is an important issue and I believe that Mr. Lewis' questions are deserving of thorough answers. Therefore, I would appreciate your looking into whether there is any basis for the staff to change its position with regard to the adequacy of the seismic design criteria at the Palo Verde site. I am enclosing for your information, the letter sent to me by Mr. Lewis. I look forward to receiving your reply.

Thank you for your assistance.

Sincerely,

*Morris K. Udall*  
MORRIS K. UDALL  
Chairman

enclosure

January 21, 1978

JAN 26 REC'D

Congressman Morris K. Udall  
235 Cannon House Office Building  
Washington, D.C. 20515

Congressman Udall:

The awesome power produced by splitting an atom has great potential for both good and evil. Yet, even the beneficial uses of nuclear power must be carefully scrutinized to prevent an unintentional catastrophe. In this regard I have written you for information about a possible safety hazard with the Palo Verde Nuclear Project.

The information I am requesting concerns the seismic (earthquake) potential of southern Arizona and its impact upon the design of the Palo Verde Nuclear Project.

I first became interested in this subject while I was a law student attending a class on energy law at the law college at Arizona State University. In that class I had the opportunity to question an attorney for the Palo Verde Project about many aspects of the nuclear plant. He answered most questions to my satisfaction, except this one---"On the richter scale what size earthquake can the Palo Verde Project withstand?"

My dissatisfaction with his response to the above question interested me enough to research the answer myself. I discovered that this seeming simple question is very difficult, if not impossible to answer accurately. All of the various facets involved in this question are beyond my expertise and I have prepared a few basic questions which I would like you to respond to.

For the sake of brevity I have narrowed the questions down to those which concern the earthquake potential of southern Arizona. The main hypothesis which I would like you to research is:

Whether southern Arizona is part of the same seismic area as the area in which the Sonoran Earthquake of 1887 occurred.

If this hypothesis is correct, then an earthquake of eight point five (8.5) on the richter scale could occur randomly at any place in southern Arizona. Therefore, I have prepared the following five (5) questions, which when answered, will resolve my doubts <sup>about</sup> the safety hazards of Palo Verde Nuclear Project.

1. Broadly stated, what evidence supports and negates the above hypothesis that southern Arizona is part of the same seismic area in which the Sonoran Earthquake occurred.

2. The writers of the preliminary safety analysis stated that since an earthquake had occurred near the present site and was not due to a known tectonic structure, that an earthquake could be expected at the site vicinity.

- a. What was the probable cause of this earthquake?
- b. How accurate can we predict the size and frequency of occurrence of such earthquakes when they are not due to known tectonic structures?
- c. What efforts have been made to predict the occurrence of earthquakes in Arizona?

3. In a separate report by the United States Geological Survey, the writers did not discover enough evidence to warrant the existence of one of seismic zones surrounding the Palo Verde Nuclear Project.

- a. What evidence supports and negates the existence of the remaining zones?
- b. What evidence supports and negates the description of these zones as circular rather than a different shape?
- c. What is the purpose and importance of these zones on the the gravitational force caused by an earthquake?

4. In the above report the writers for the United States Geological Survey concluded that the preliminary safety analysis had underestimated the probable size of an earthquake occurring within one of the zones by one (1) richter point.

- a. What is the probable explanation for this discrepancy?
  - b. How accurate is the United States Geological Survey report as compared to present seismic prediction methods?
  - c. Did the preliminary safety analysis underestimate the magnitude of possible earthquakes in any other zones?
5. What would be the effect of a Sonoran-type earthquake on the buried faults located under the Palo Verde site?

The seismic potential of Arizona, which the above questions deal with, may constitute an un-resolved safety hazard. I frankly do not know if any such hazard exists, however by asking these questions I only want to learn the truth about my fears. Thankyou in advance for your attention to this matter.

Please respond to: David A. Lewis  
5708 E. 1st Street.  
Tucson, AZ. 85711

Sincerely,

David A. Lewis

ERRATA AND LACUNAE -- CORRECTIONS TO  
INITIAL DECISION OF MAY 24, 1976

This Board's Initial Decision of May 24, 1976, is hereby  
corrected for errata and lacunae as follows:

- 1) Page 4, line 2, "March 23 through 27" is changed  
to read -- February 23 through 27 --.
- 2) Page 8, line 7, "Regulatory Guide 1.5" is changed  
to read -- Regulatory Guide 1.24 --.
- 3) Page 10, line 12, "levels at below" is changed to  
read -- levels at not significantly higher than --.
- 4) Page 15, line 7, before "and two reactor coolant  
pumps" there is inserted -- one outlet pipe --.
- 5) Page 17, line 12, "Amendments 1 through 15" is  
changed to read -- Amendments 1 through 16 --.

- 6) Page 21, lines 14 and 15, "The operating plant managers for each of the three units of Palo Verde report to the Vice President of Power Production" is changed to read -- The operating assistant plant managers for each of the three units of Palo Verde report to the plant manager for the facility who, in turn, reports to the Power Production Vice President --.
- 7) Page 21, line 17, before "plant manager" there is inserted -- assistant --.
- 8) Page 21, line 19, "He is responsible" is changed to read -- Under supervision of the plant manager, he is responsible --.
- 9) Page 22, line 2, before "plant manager" there is inserted -- assistant --.
- 10) Page 22, line 4, before "The Power Production Vice President" there is inserted the following new sentence: -- Technical support for the plant staff will be provided primarily by the Nuclear Service Department of APS. --.
- 11) Page 36, line 12, "300,000 gallon capacity" is changed to read -- 500,000 gallon capacity --.

- 12) Page 36, lines 12 to 13, "(SER, § 9.5.1; PSAR, § 9.5.1.1.1)" is changed to read -- (PSAR, Amendment 14, § 9.5.1.1.1) --.
- 13) Page 41, last line, "(FES, § 4.1.2; ER, § 4.1.1.1 and Supp. 1;" is changed to read -- (FES, § 4.1.1.2; ER, § 4.1.1 and Supp. 1; --.
- 14) Page 46, line 7, and also line 11, "9.1 millirem per year" is changed to read -- 0.1 millirem per year --.
- 15) Page 49, lines 1 and 2, "from any from any" is changed to read -- from any --.
- 16) Page 52, lines 5 through 7, "will further reduce the dispersion characteristics over those calculated in the FES by a factor of two (Tr., pp. 1036-37)" is changed to read -- will, in most cases, further reduce the dispersion characteristics from those calculated in the FES to amounts not exceeding one-half of such calculated values (Tr., pp. 1047-48) --.
- 17) Page 60, last line, the first word "go" is changed to read -- to --.
- 18) Page 60, last line, at the end of the line, the period "." is deleted.

- 19) Page 90, lines 19 and 20, "condition (5) of the aforesaid list" is changed to read -- condition 3, E, (5) of Appendix B to this initial decision --.
- 20) Page 4, line 25, of Appendix B to this initial decision, "remain at or below an elevation" is changed to read -- not rise more than one foot above an elevation --.

IT IS SO ORDERED.
