RE: Immobilization System for Transportation Unit

Wilcox Truck Line, Inc. is an MCEP approved truck carrier sponsored by the Idaho National Laboratory. We are approved to transport security-sensitive materials nation-wide for the Contractors located at the Idaho National Laboratory. To meet certain requirements to transport these materials two immobilization device set forth in the NRC Regulations for Physical Protection of Shipments of Irradiated Reactor Fuel. Final Report have been installed in our vehicles.

As per the NUREG-0561, Rev 2, Section 3.3.3, Format of Approval Request, we are submitting this letter of request for approval of the immobilization device under specifications protected in accordance with 10 CFR73.21 and 10 CFR 73.22. We believe our 2 separate systems meet the requirements of Sections 3.3, 3.3.1, 3.3.2, and 3.4 of the NRC Regulations referenced above.

We ask that you please review the attached documents, processes, details, and photographs as proof of regulation compliance.

The documents and diagrams are very straightforward, however if any questions arise, we will be pleased to answer and respond as might be needed.

Thank you for the opportunity for this review, and look forward to being of service to this highly important materials transportation.

Very Sincerely,

David R. Bennett

President
