PUBLIC SERVICE COMPANY

P.O. BOX 21666 - PHOENIX, ARIZONA 85036

October 1, 1981 ANPP-19053-JMA/TFQ

Mr. R. L. Tedesco Assistant Director for Licensing Division of Licensing Office of Nuclear Reactor Regulation U.S. Nuclear Regulatory Commission Washington, D.C. 20555

U.S. NUCLEAR REGULATON COMMISSION

- Subject: Palo Verde Nuclear Generating Station (PVNGS) Units 1, 2 and 3 Docket Nos. STN-50-528/529/530 File: 81-056-026; G.1.10
- Reference:
- (A) Letter from R. L. Tedesco, NRC, to E.E. Van Brunt, Jr., dated August 13, 1981; Subject: Request for Addi tional Information and Draft SER Inputs (Materials Engineering Branch); (MTEB).
 - (B) Letter from E. E. Van Brunt, Jr., to R. L. Tedesco, dated September 16, 1981; ANPP-18929.

Dear Mr. Tedesco:

Attached is the revised response to NRC Question 251.5 for your use. Our original response was transmitted to you through Reference (B). This revision will be incorporated into the FSAR in a future amendment.

Please contact me if you have any further questions on this matter.

Very truly yours,

8001 ,/1

E. E. Van Brunt, Jr. APS Vice President, Nuclear Projects ANPP Project Director

EEVBJr/TFQ/ma

NRC Question 251.5:

"Provide data on the qualifications of the personnel performing the fracture toughness tests to demonstrate compliance with Paragraph 111.B.4 of Appendix G, 10 CFR Part 50."

Response:

2

The personnel performing the preservice charpy and drop weight impact testing were qualified by schooling, training, and many years of experience. Their qualification to perform work was certified by qualified supervisory personnel. Records of the certification of personnel are maintained and available for review at C-E's Chattanooga facility.

Individuals performing inservice fracture toughness test shall be qualified by training and experience and shall have demonstrated competency to perform the tests in accordance with written procedures and ASME Code, Section III, Subarticle NB-2300, Fracture Toughness Requirements for Materials. The recommendations for qualification of nuclear power plant inspection, examination, and testing personnel that are included in ANSI N45.2.6 -1973 are generally acceptable and provide an adequate basis for complying with Paragraph III.B.4 of Appendix G, 10 CFR Part 50.
