Attention: Mr. F. A. Wenslawski, Chief
Radiological Safety Branch

Subject: NRC IE Inspection Report 50-528/83-41-02
Radiation Monitoring System Testing
File: 84-019-026; D.4.33.2

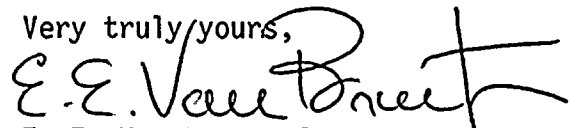

Reference: (a) Letter from E.E. Van Brunt, Jr. to J.B. Martin,
NOLD-84-142, dated March 23, 1984
(b) Telecon between C.I. Sherman (NRC Region V) and
T. Bloom (APS), dated September 14, 1984

Dear Mr. Wenslawski:

In response to our commitment in reference (a), we have discussed our finalized plans, concerning NRC Deviation Item 50-528/83-41-02 relative to our commitment to Regulatory Guide 1.68, Appendix A, Item 13, with Mr. C.I. Sherman of your staff on September 14, 1984. Attached please find the Bechtel Technical Specification (13-NM-997B) and the Science Applications International Corporation Proposal for "Airborne Monitor Sampling Line Plateout and other Measurements at Unit 1, PVNGS" which describe our program to meet our Regulatory Guide testing commitment. Page four of the Bechtel Specification highlights the Radiation Monitoring System testing to be performed. As agreed to by Mr. Sherman, reference (b), this testing will be conducted Post-Fuel Load upon completion of all applicable Radiation Monitoring System Design Changes in order to obtain more representative data.

If you desire any further information concerning this matter, we shall be glad to provide it to you.

Very truly yours,

E. E. Van Brunt, Jr.
APS Vice President
Nuclear Production
ANPP Project Director
