

Docket Nos.: 50-528, 50-529
and 50-530

DEC 10 1984

Applicant: Arizona Public Service Company
Facility: Palo Verde, Units 1, 2 and 3
Subject: Summary of Meeting on Security Program

A meeting was held with the applicant on November 15, 1984 at the Palo Verde site. The purpose of the meeting was to discuss vital area barriers for the security program. A summary of the meeting and the list of attendees are provided in the enclosed report. The conclusion is that no major unresolved safeguards issues were identified as a result of the meeting.

Applicant

Arizona Public Service

Facility

Palo Verde Nuclear Station

On November 15, 1984 a meeting was held at the Palo Verde Site to discuss concerns raised by the staff regarding vital area barriers. The following personnel attended the meeting:

Charles Gaskin NRC/NMSS
Doeg Nelson APS
Gary Clyde et.al APS Licensing

Summary

During the meeting and associated site tours the construction, installation, and designation of vital area barriers were discussed. The applicant indicated the barriers to be declared vital area barriers and provided information as to construction and installation techniques. The applicant also indicated that the installation would be completed in time for a December 7, 1984 licensing schedule. The reviewer noted that the actual work had not yet begun and expressed concern regarding the capabilities of the applicant to meet the schedule. The reviewer also noted that the proposed barriers would satisfy staff concerns.

Action

The applicant must complete the installation of the vital barriers prior to license issuance or provide appropriate compensatory measures.

Concerns

The applicant is well below strength on security force staffing. If the construction of the vital area barrier is not completed on schedule the applicant will have to provide trained compensatory armed guards. These compensatory guards may reduce the available trained security force members to a level insufficient to perform the normal security functions. Hence, a license issuance delay may be anticipated.

Conclusion

While it appears that security at the site may be on a critical path for a December 7, 1984 licensing, there were no major unresolved safeguards issues identified as a result of this meeting.
