Response requested by November 1, 2017.

Mr. Simonton

Good Morning.

By letter dated December 22, 2015, as revised by letters dated July 27, 2016, May 19, 2017, and the response to staff's request for additional information dated August 31, 2017, (Agencywide Documents Access and Management System (ADAMS) Accession Nos. ML15356A655, ML16209A477, ML17139D394, and ML17243A459, respectively), titled, "Addition of Two Turbine Building Sump Pumps," and designated License Amendment Request (LAR) 15-019, Southern Nuclear Operating Company, Inc., (SNC) requested that the U.S. Nuclear Regulatory Commission (NRC) amend the combined licenses (COL) for Vogtle Electric Generating Plant (VEGP) Units 3 and 4, COL Numbers NPF-91 and NPF-92, respectively.

If approved, the proposed changes were to accommodate increased flow to the turbine building main sumps during condensate polishing system rinsing operations.

The Notice of Consideration of Issuance for this LAR was published in the *Federal Register* on October 25, 2016 (81 FR 73428), and on July 5, 2017, the staff published a new *Federal Register* notice (82 FR 31089) with a new proposed no significant hazards consideration determination.

The amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the amendment. The NRC is in process of finalizing its review of this LAR. Please provide your comments, if any, to me by **November 1, 2017**.

Respectfully,

Billy

William (Billy) Gleaves
Sr. Project Manager
U.S. Nuclear Regulatory Commission
Office of New Reactors
