

October 19, 2017

Chief, Materials Safety Licensing Branch
Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission

SUBJECT: Request to Amend License Number: 09-23977-01E

Hello,

DRS Training and Control Systems, LLC would like to apply for an amendment to our current NRC Material License 09-23977-01E, Docket No. 03038022.

This request is in regards to modifying Item Number 7 on our current license listing our Foil Sources as QSA Global Model AMM.1001H. This supplier no longer manufactures this particular model which is forcing us to change from QSA Global in order to provide our end product to the US Navy. Other than the change in supplier, all original product specifications will remain the same with the proposed new supplier below.

Amendment to Item Number 7: Foil Sources (Eckert & Ziegler Model 3919)

Eckert & Ziegler's Sealed Source Device Registry is 3919.

If further clarification or information is required, please feel free to contact me at your earliest convenience.

Sincerely,

Brett Byers
