

MAY 28 1986

Docket Nos.: 50-528
and 50-529

Mr. E. E. Van Brunt, Jr.
Executive Vice President
Arizona Nuclear Power Project
Post Office Box 52034
Phoenix, Arizona 85072-2034

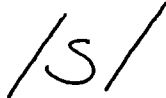

Dear Mr. Van Brunt:

Subject: Temporary Relief from Technical Specification 2.2.1, Table 2.2-1,
Item I.A.7 (Low Reactor Coolant Flow Trip)

Your letter ANPP-36693, dated May 27, 1986, requested relief from the Action Statement for the subject Technical Specification for a period of 48 hours in order to continue operation while an emergency Technical Specification change is prepared and corrective steps are implemented to change set points for the low reactor coolant flow trip to the values required for continued operation of Palo Verde, Units 1 and 2. Based on our review of the information provided, we concur that the FLOOR setting of the low reactor coolant flow trip will provide adequate protection in the interim.

This letter confirms the decision given to your staff by telephone to grant the requested 48 hour relief effective 10 PM (EDT) May 27, 1986.

Sincerely,

Frank Schroeder, Deputy Director
Division of PWR Licensing-B

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by proper documentation and that the books should be kept up-to-date at all times.

In the second section, the author details the various methods used to collect and analyze data. This includes the use of standardized forms, regular audits, and the application of statistical techniques to identify trends and anomalies.

The third section focuses on the internal controls and procedures that are in place to ensure the integrity and reliability of the information. It describes the roles and responsibilities of different departments and the checks and balances that are implemented throughout the organization.

Finally, the document concludes with a summary of the key findings and recommendations. It stresses the need for continuous improvement and the importance of staying current with the latest industry practices and technologies.

The following table provides a detailed breakdown of the data collected over the past six months. Each row represents a different category, and the columns show the values for each month.

The data shows a steady increase in sales over the period, with a notable spike in the fourth quarter. This is primarily due to the launch of our new product line.

The following table shows the results of the internal audit conducted in the second quarter. The audit identified several areas where controls were not being followed, and these have been addressed through corrective actions.

The audit also highlighted the need for more frequent communication between departments to ensure that everyone is working towards the same goals.

Overall, the audit was successful in identifying weaknesses and providing a clear path forward for improvement.

The final section of the report discusses the future outlook for the organization. It outlines the strategic goals for the next year and the initiatives that will be implemented to achieve them.

It is expected that these efforts will lead to increased efficiency, higher customer satisfaction, and overall growth for the company.
