Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit No. 2  
Docket No. 50-389  
NFP-16 License Conditions

Florida Power and Light Company Letter L-84-333, dated November 20, 1984, provided a status of the St. Lucie Unit 2 License Conditions and requested that those conditions that have been completed to the satisfaction of NRC be deleted in a future license amendment.

The purpose of this letter is to request a license amendment which would accomplish our earlier request. Therefore, in accordance with 10 CFR 50.90, submitted herewith are three signed originals and forty copies of a request to amend Operating License NPF-16.

The requested changes are indicated on the accompanying pages of the Operating License.

In accordance with 10 CFR 50.91 and 50.92, Florida Power & Light Company has determined that this amendment does not involve any significant hazards considerations nor unreviewed safety question because deletion of license conditions which have been completed to NRC satisfaction is strictly administrative in nature.

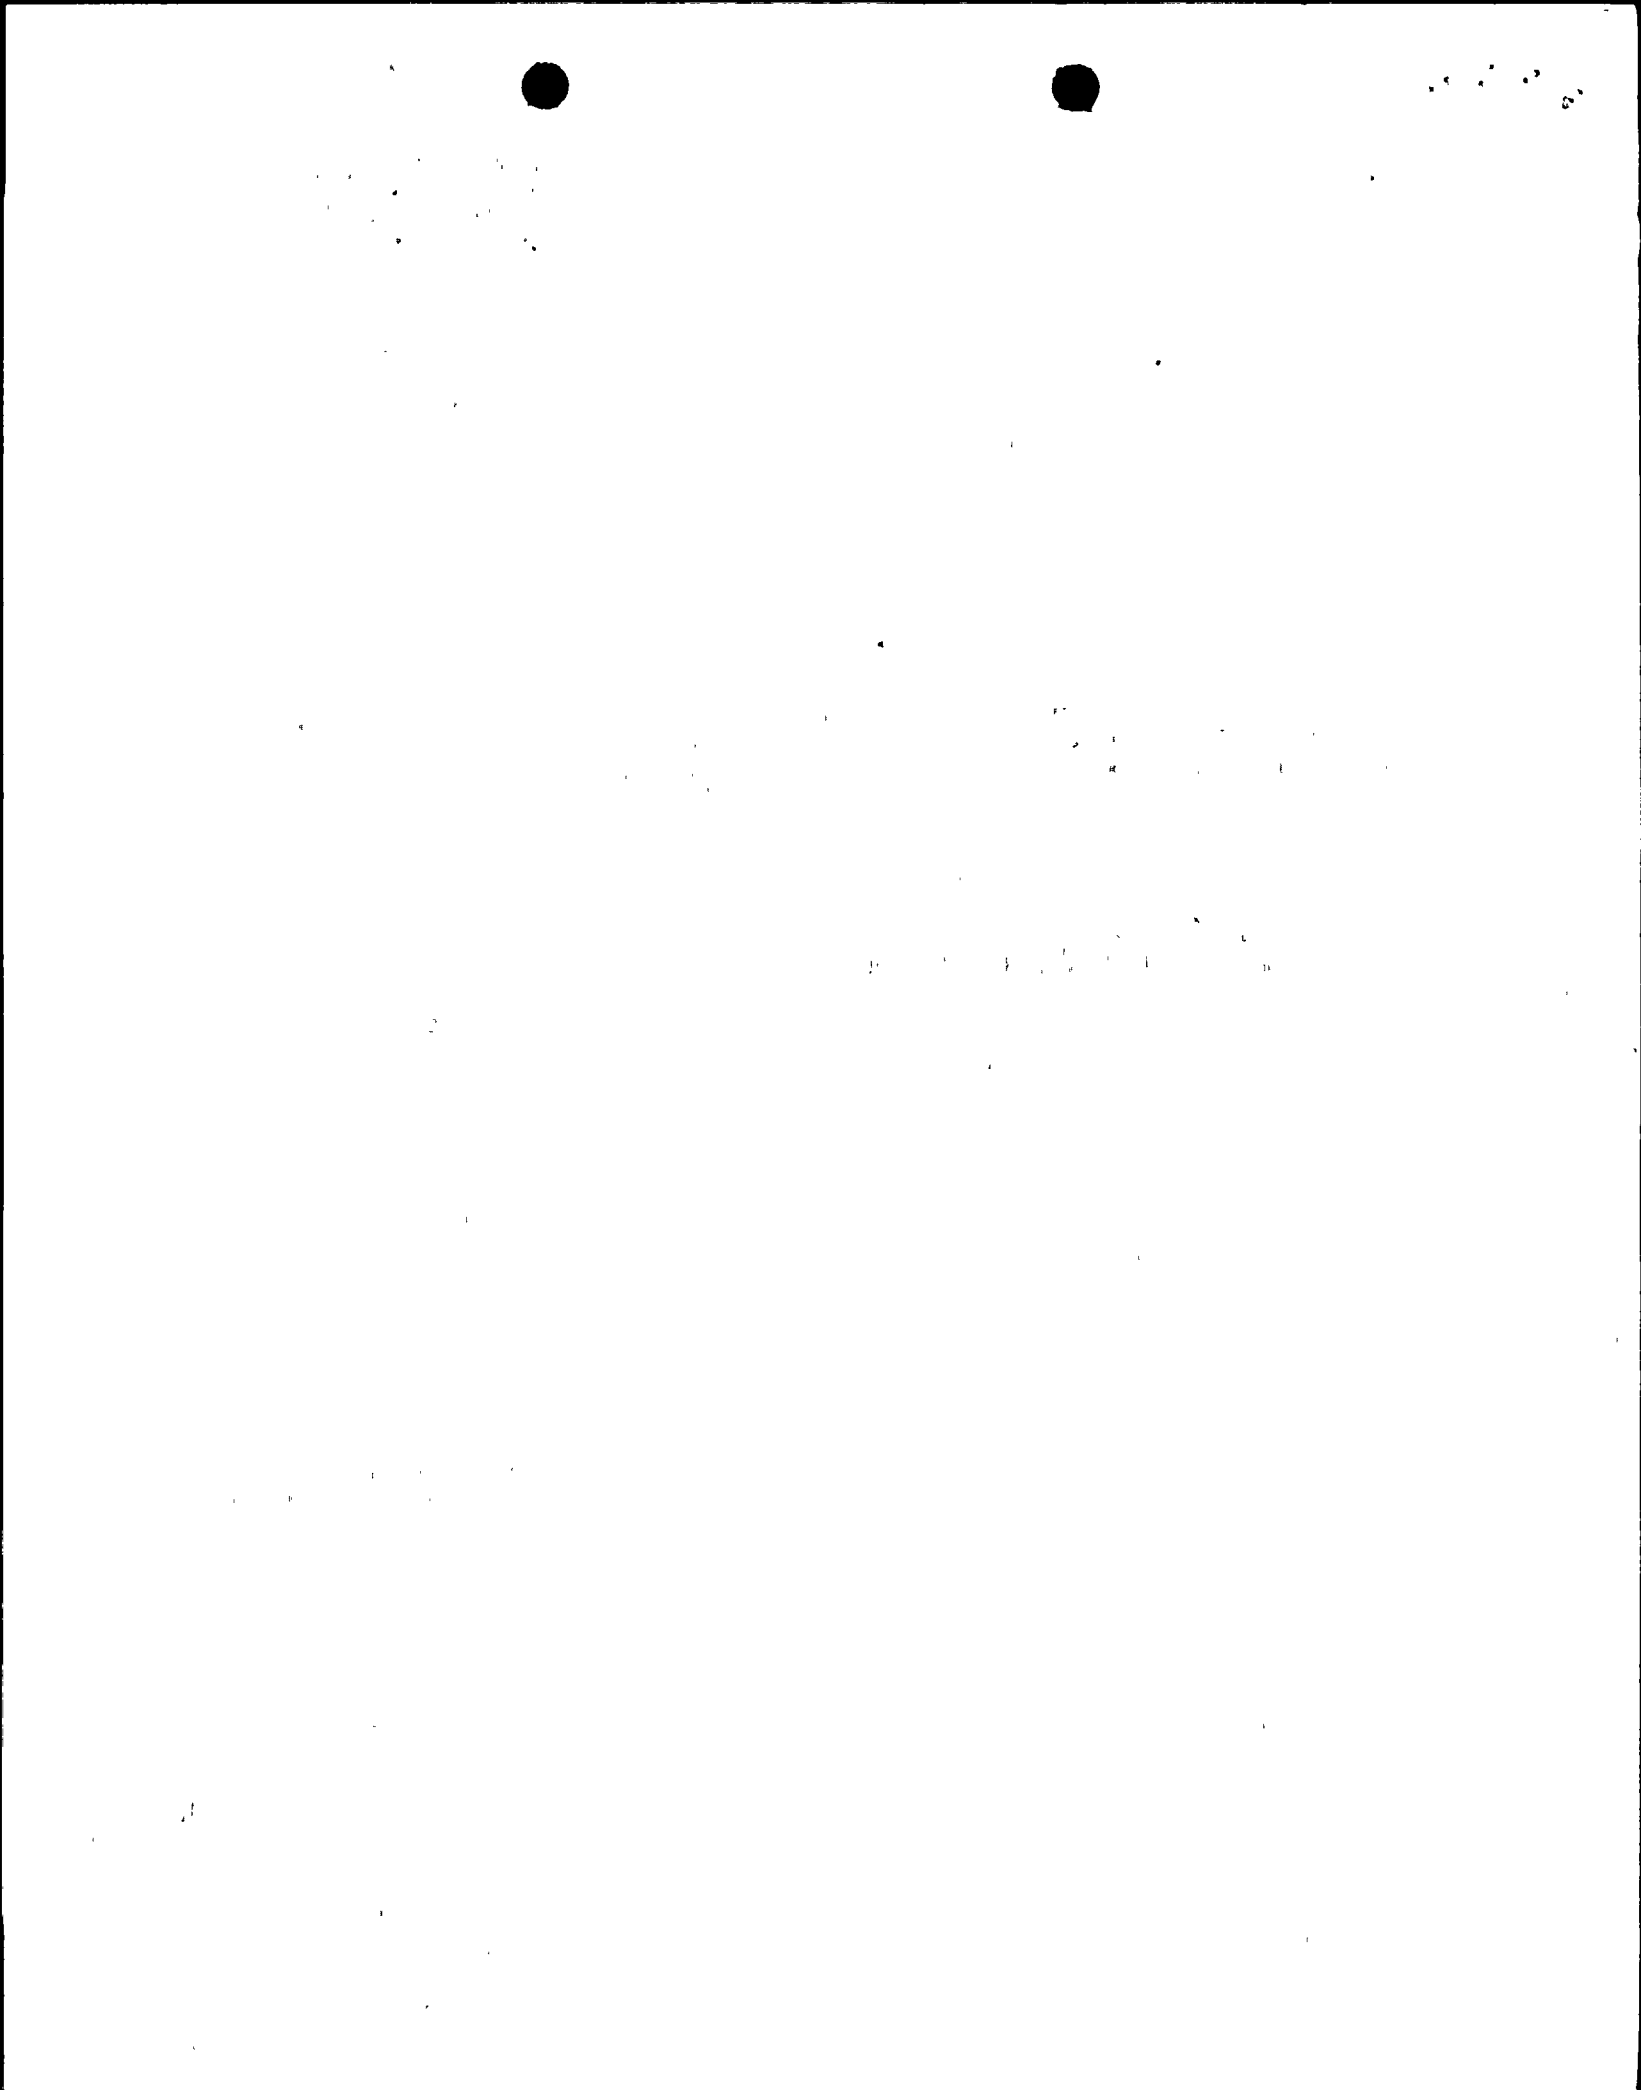

In accordance with 10 CFR 170.21, attached is a check for the \$150.00 application fee.

In accordance with 10 CFR 50.92(b)(1), a copy of the proposed amendment is being forwarded to the State Designee for the State of Florida.

### No Significant Hazards Considerations Determination

Florida Power & Light Company has completed all but two (2.C.12 and 2.C.19) of the St. Lucie Unit 2 License Conditions. The NRC has reviewed FPL's implementation of the completed license conditions and has found the implementation satisfactory. By letter dated November 20, 1984 (L-84-333), FPL requested that NRC delete those license conditions that had been completed. This proposed license amendment would accomplish that November 20, 1984 request.

Florida Power & Light Company has determined that the proposed license amendment is strictly administrative in nature. The amendment does not change any technical specifications and is requested only to "clean-up" the operating license and clarify those outstanding license conditions. Therefore, it has been determined that no significant hazards consideration are involved.
