Subject: F-430 Renewal request

Hi Victor,

I'm John Vera, project manager for the F-430 renewal request. I am writing to inform you of a couple of administrative issues with your application that need to be resolved before issuance of the renewed CoC. The first is, your submittal of August 24, 2017, included a partial revised proprietary SAR. The submittal did not include an affidavit requesting withholding of proprietary information in accordance with 10 CFR 2.390. I also wanted to clarify whether your submittal of SAR Version (B) was meant to only include the first 90 pages of the consolidated SAR? Because that is what is in our document system. I would think your submittal would include the revised ~ 340 page document. Also, while your submittal of April 6, 2017, did include an affidavit for withholding, it did not include a redacted version of the SAR for release to the public.

To remedy these issues, please:

- 1) Submit your affidavit requesting withholding of proprietary information in accordance with 10 CFR 2.390, for the SAR Version (B)
- 2) Submit the revised consolidated SAR Version (B) in its entirety, both proprietary and redacted versions.

Feel free to contact me via email or by phone (+1 301-415-5790) with any questions.

Regards,
John A. Vera, Ph.D.
