Yes, if issued, the DA permit would include the "Sea Turtle and Smalltooth Sawfish Construction Conditions" dated March 23, 2006 as a special condition.

Megan

Can you confirm that the Corps will include various requirements as outlined in a letter dated April 26, 2017 from the National Marine Fisheries Services-Protected Resources Division, including "Sea Turtle and Smalltooth Sawfish Construction Conditions" dated March 23, 2006 in the Department of Army permit, if issued? These requirements would support the proposed Turkey Point Units 6 and 7 project.

Thank you.
