Subject: [External_Sender] Follow up question to Reply to Notice of Violation

Geoffrey,

A tracking schedule will be developed to ensure that all tasks are completed within regulatory guidelines. This schedule will be shared with upper management and the radiation safety committee to make sure more than one person is aware that these tasks need to be completed in a timely manner. If the radiation safety officer is not available to perform the tasks, sharing the schedule with upper management will help ensure the tasks can be completed by another person in the time frame allotted.

Thank you,

William

William Wright
