Dear Mr. Kyle

MAY 01 RECD

I would like some answers to some questions that I have. Please address them all:
169565
18001

1) Why can't a person get ~~into~~ ~~a person get~~ funding on a non-conventional energy efficient home (self generating)?
Question: does not make electricity
However, it is not economical. ~~of source~~

2) Why won't FHA or VA include solar hot water + solar ~~generated~~ generated electricity in a home's appraised value? up to 20% of mortgage as long as there is a backup source of energy

3) Why wasn't the decommissioning cost of Palo Verde Nuclear Power Plant considered before construction of the plant began? Current decommissioning estimate is \$30 Billion.

4) Why is there no current evacuation plan in case of a melt down at Palo Verde Nuclear Power Plant?

5) Why is there so much ugly air pollution in Central Phoenix?

6) Why is there not a Department of Natural Resources that would be able to bring together all of the energy + environment offices as to create a more workable Department as a whole. Currently they are all separate + not exchanging ideas, which is vital for a creative efficient production of ideas.

Please answer all these questions for me. after all I did elect you to office, & if you find you are not able to do so I will go to someone else who can.

Phoenix has gotten very complicated and a need for organization & smart ideas is vital to its future

I didn't have time to type a neat letter because I have a business to run & I know you can understand this, but I know these questions I have for you are important & your addressing them is crucial to me & everyone else. It is your job.
