SUBJECT: VOID LETTER CONCERNING APPLICATION FOR LICENSE TERMINATION,
CONTROL NO. 600802

Dear Ms. Fields:

This concerns the subject application for termination of your material license. An email was sent to you and Mr. Denton on October 6, 2017, requesting that a termination form be submitted, along with the documentation of the disposition of the two portable gauges referenced in the December 2010 inventory you submitted to the agency and observed in your January 2011 inspection report.

On October 10, 2017, a telephonic discussion was held with Mr. Denton, who informed the agency that your facility was still in possession of portable gauges and wanted to continue with the license authorization to use them. The facility misunderstood the agency's notification email dated July 6, 2017, that your license would expire on August 31, 2017, and a renewal application would need to be submitted on or before that date.

On October 23, 2017, we discussed by telephone, the need to submit a new application for portable gauge use with the corresponding application fee. You affirmed you understood that:

1. The gauge(s) cannot be used by your facility until you have received your new license;
2. They must be secured in accordance with 10 CRF 30.34(i) <https://www.nrc.gov/reading-rm/doc-collections/cfr/part030/>; and
3. You may add in your application packet, a statement requesting to expedite, noting that your facility had previous NRC License No. 11-27081-01/030-32235.

The NRC has concluded that you are no longer pursuing this application termination. Therefore, you are hereby notified that this application for termination has been voided without prejudice. This action is without prejudice to the submission of a new application.

Sincerely,

/RA/

Latischa M. Hanson, M.Sc., Health Physicist
Materials Licensing and Inspection Branch
