

March 12, 1990

Mr. William F. Conway  
Executive Vice President, Nuclear  
Arizona Public Service Company  
P. O. Box 52034  
Phoenix, Arizona 85072-2034

Dear Mr. Conway:

Subject: Palo Verde Nuclear Generating Station (PVNGS) Units 1, 2, and 3  
PVNGS Licensed Operator Requalification Program and Ongoing  
Procedural Compliance Corrective Actions

Reference: Letter from Mr. J. M. Levine, APS to Mr. J. Martin, NRC  
dated February 2, 1990

The referenced letter documented the Arizona Public Service Company's (APS) program for formalizing procedures to manage and conduct the Palo Verde Nuclear Generating Station's Licensed Operator Requalification Program and the status of commitments to correct identified procedural compliance problems. The formalization of procedures for managing the PVNGS Licensed Operator Requalification Program and the update of the status of the corrective action for procedural compliance problems were in response to findings identified during a Licensed Operator Requalification Program evaluation conducted by the NRC.

The results of the formalization of procedures for the PVNGS Licensed Operator Requalification Program and conduct of operation procedure changes will be verified during future inspections and Licensed Operator Requalification Program evaluations.

Your cooperation and response to these concerns is appreciated.

Sincerely,

151

Roy Zimmerman, Director  
Division of Reactor Safety and Projects
