

Regulatory Guide Periodic Review

Regulatory Guide Number: 1.121, Revision 0

Title: Bases for Plugging Degraded PWR Steam Generator Tubes

Office/Division/Branch: NRR/DE/CSGB
Technical Lead: Ken Karwoski

Staff Decision: Reviewed with no issues identified

1. What are the known technical or regulatory issues with the current version of the Regulatory Guide (RG)?

There are no technical or regulatory issues with the current version of Regulatory Guide 1.121.

2. What is the impact on internal and external stakeholders of not updating the RG for the known issues, in terms of anticipated numbers of licensing and inspection activities over the next several years?

Because there are no known technical issues with the current regulatory guide, there is no impact on internal or external stakeholders if the existing guide is not updated.

3. What is an estimate of the level of effort needed to address identified issues in terms of full-time equivalent (FTE) and contractor resources?

There are no identified issues with the current regulatory guide. Therefore, there are no costs associated with the updating of the current regulatory guide.

4. Based on the answers to the questions above, what is the staff action for this guide (Reviewed with no issues identified, Reviewed with issues identified for future consideration, Revise, or Withdraw)?

Reviewed with no issues identified.

5. Provide a conceptual plan and timeframe to address the issued identified during the review.

N/A

NOTE: This review was conducted in March 2013 and reflects the staff's plans as of that date. These plans are tentative and are subject to change.
