

August 4, 1992

Docket Nos. 50-528, 50-529
and 50-530

Mr. William F. Conway
Executive Vice President, Nuclear
Arizona Public Service Company
Post Office Box 53999
Phoenix, Arizona 85072-3999

Dear Mr. Conway:

SUBJECT: CONTAINMENT HYDROGEN ANALYZERS PALO VERDE NUCLEAR GENERATING STATION

This is in response to your letter of June 26, 1992, in which you reported improvements in containment hydrogen analyzer performance at Palo Verde. You indicate that as a result of improved maintenance, the hydrogen analyzers now consistently meet the requirement to provide continuous indication of hydrogen concentration within 30 minutes of activation. Therefore, you have cancelled your earlier plan to replace them.

Since these monitors now fully meet the response time characteristics called for in NUREG 0737, this is an acceptable revision to our Safety Evaluation of October 10, 1991.

Sincerely,
Original signed by:

Charles M. Trammell, Senior Project Manager
Project Directorate V
Division of Reactor Projects III/IV/V
Office of Nuclear Reactor Regulation
