Docket Nos. 50-335 and 50-389
License Nos. DPR-67 and NPF-16
EA 86-95

Florida Power and Light Company
ATTN: ✓ Mr. C. O. Woody
Group Vice President
Nuclear Energy Department
P. O. Box 14000
Juno Beach, FL 33408

Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NOS. 50-335/86-09 AND 50-389/86-08)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted on April 14-18, 1986, at your St. Lucie facility. As a result of this inspection, significant failures to comply with NRC requirements were identified. An Enforcement Conference to discuss these matters was held at Juno Beach, Florida, on May 9, 1986.

The first violation described in the enclosed Notice of Violation involves a failure to prepare two boxes of radioactive materials offered for transport so that under conditions normally incident to transport the radiation level does not exceed 200 millirem per hour at any point on the external surface of the package. The remaining two violations described in the enclosed Notice involve a failure to package a shipment of low specific activity material in a DOT Specification 7A Type A package or a strong, tight package and a failure to maintain written procedures regarding respiratory protective equipment issuance records.

In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1986), the first violation described in the enclosed Notice has been classified as a Severity Level III violation. Normally, a civil penalty is considered for a Severity Level III violation. However, after consultation with the Director, Office of Inspection and Enforcement, I have decided that a civil penalty will not be proposed in this case due to your prior good performance in this area. The remaining two violations have been categorized as Severity Level IV violations.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to the Notice, including your proposed corrective actions, the NRC will determine whether

further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC's Public Document Room.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,

Original signed by Roger D. Walker

J. Nelson Grace
Regional Administrator
