Dear Mr. Berkow:

The purpose of this letter is to inform you that Combustion Engineering (C-E) is downgrading the status of four documents [References (A)-(D)] submitted to the NRC from proprietary to non-proprietary. The subject documents were prepared by C-E and submitted to the staff by Florida Power and Light in support of repair activities being performed on the St. Lucie Unit 1 core support barrel during the 1983-1984 time period.

At the time of their submittal, C-E considered certain material included in these documents to be proprietary in nature and the appropriate affidavits, executed by C-E, attesting to that belief were provided to the Staff. With the passage of time, however, we have determined that it is no longer necessary to safeguard the information contained in the subject

documents. We have, therefore, downgraded their status to non-proprietary. This information is being provided so that you may reclassify documents in your possession and process them accordingly.

If you have any questions on this matter, please do not hesitate to call me or Mr. C. M. Molnar of my staff at (203) 285-5205.

Very truly yours,
