IE HQ FILE COPY

Subject: Docket No. 50-244
Semiannual Radioactive Effluent Release Report January -
June, 1984

Dear Dr. Murley:

The enclosed information is being forwarded to you in accordance with the requirements of Technical Specification Sections 6.9.1.4 and 4.12.

Several typographical errors in the sign of the exponent were included in the gaseous effluent portion of the July - December, 1983 Semiannual Radioactive Effluent Release Report. Corrected pages are included with this report.

A listing is included of those batch releases for which the LLD of 5E-07 was not obtained with a brief explanation as required by Table 4.12-1 subnote (a) of the Technical Specification. The LLD value is determined by counting one liter of sample for one hour. The normal LLD values for samples having little or no activity are <3E-07.

Very truly yours,

Roger W. Kober
