

JAN 14 1986

Docket No. 50-244

LICENSEE: Rochester Gas and Electric Corporation

FACILITY: R. E. Ginna Nuclear Power Plant

SUBJECT: SUMMARY OF DECEMBER 4, 1985 MEETING ON ROCHESTER GAS AND  
ELECTRIC CORPORATION MANAGEMENT ORGANIZATION

The NRR and Region I staff met with representatives of Rochester Gas and Electric Corporation to discuss their proposed management organizational changes. One request of the utility was to eliminate the need for the Operations Manager to hold an SRO license. The staff advised the utility that this request could not be accepted. The staff asserted that the Operations Manager should maintain a current license. As a result of this decision, a revised proposal will be submitted by the licensee.

Sincerely,

*151*

Charles L. Miller, Project Manager  
Project Directorate #1  
Division of PWR Licensing-A

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It is essential to ensure that all data is entered correctly and that any discrepancies are identified and corrected promptly.

3. The second part of the document outlines the various methods used to collect and analyze data, including surveys, interviews, and focus groups.

4. These methods are used to gather information about the attitudes and behaviors of the target population, which is then used to inform decision-making.

5. The third part of the document describes the process of identifying and measuring the variables that are most relevant to the study.

6. This involves a thorough review of the literature and a careful selection of the most appropriate measures for each variable.

7. The fourth part of the document discusses the various statistical techniques used to analyze the data, including regression analysis, factor analysis, and cluster analysis.

8. These techniques are used to identify the relationships between the variables and to test the hypotheses that were developed at the beginning of the study.

9. The final part of the document discusses the implications of the findings and the limitations of the study.

10. It is important to recognize that while the study provides valuable insights, there are still many questions that need to be answered in the future.

1. The first part of the document  
describes the general principles  
of the project. It is divided  
into three main sections:  
the first section deals with  
the objectives of the project,  
the second section deals with  
the methodology, and the third  
section deals with the results.  
The first section is the most  
important, as it sets the  
context for the entire project.  
It is followed by the second  
section, which describes the  
methodology used in the project.  
The third section, which  
describes the results, is the  
most detailed and is divided  
into several sub-sections.  
The first sub-section deals  
with the data collection, the  
second sub-section deals with  
the data analysis, and the  
third sub-section deals with  
the conclusions. The first  
sub-section is the most  
important, as it provides the  
raw data for the project. It  
is followed by the second  
sub-section, which describes  
the analysis of the data. The  
third sub-section, which  
describes the conclusions, is  
the most detailed and is  
divided into several sub-  
sections. The first sub-  
section deals with the data  
collection, the second sub-  
section deals with the data  
analysis, and the third sub-  
section deals with the  
conclusions. The first sub-  
section is the most important,  
as it provides the raw data  
for the project. It is  
followed by the second sub-  
section, which describes the  
analysis of the data. The  
third sub-section, which  
describes the conclusions, is  
the most detailed and is  
divided into several sub-  
sections. The first sub-  
section deals with the data  
collection, the second sub-  
section deals with the data  
analysis, and the third sub-  
section deals with the  
conclusions.
