

NOV 18 1993

Docket No. 50-244

Dr. Robert C. Mecredy
Vice President, Ginna Nuclear Production
Rochester Gas and Electric Corporation
89 East Avenue
Rochester, New York 14649

Dear Dr. Mecredy:

SUBJECT: NRC INSPECTION 50-244/93-20 (9/12/93 - 10/23/93)

This letter transmits the September 12 to October 23, 1993 inspection findings of Messrs. T. Moslak and E. Knutson at the R. E. Ginna Nuclear Power Plant. At the end of the inspection, the findings were discussed with Mr. J. Widay and other members of your staff.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations of activities in progress. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. Within this scope a concern was identified which indicates a need for increased management attention to ensure that radiological sampling procedures contain the appropriate level of detail to assure that plant operations are not adversely affected when implementing these procedures. In addition, it appears that you may not be properly interpreting your technical specifications regarding containment integrity where you have single valve isolation of closed systems.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

No response to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
James C. Linville

James C. Linville, Chief
Projects Branch No. 3
Division of Reactor Projects
