Washington, DC 20555

Dear Sirs:

Subject: Palo Verde Nuclear Generating Station (PVNGS)
Units 1, 2, and 3
Docket Nos. STN 50-528/529/530
NRC Generic Letter 89-10, Supplement 5, Inaccuracy
of Motor-Operated Valve Diagnostic Equipment
File: 94-010-026; 94-180-419

By letter dated September 28, 1993, Arizona Public Service Company (APS) responded to Supplement 5 of NRC Generic Letter 89-10. APS' letter indicated that vendor information regarding the accuracy of stem-mounted strain gauges would be evaluated for its effect on motor-operated valve test data by February 15, 1994. As a result of APS' review of the initial reports, additional information has been requested from the vendor to address stem-mounted strain gauge accuracy for each of the installation configurations used at PVNGS. Based upon the schedule for receipt of these additional reports, APS' final evaluation, including the determination of appropriate corrective actions, will be completed by July 15, 1994.

Should you have any questions, please contact Richard A. Bernier at (602) 393-5882.

Sincerely,

WFC/RAB/SAB/rv
