(NOTICE OF VIOLATION)

This refers to the inspection conducted by K. Johnston, H. Freeman, J. Kramer, and A. MacDougall of this office on January 11 through February 14, 1994. In addition, this refers to the inspections conducted by B. Olson on January 18-21 and J. Winton on January 24 through February 17. The inspection included a review of activities authorized for your Palo Verde facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation pertains to a worker who failed to follow procedures when he removed his security badge and dosimetry while working in a radiological controlled area inside the protected area.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.
