SUBJECT: NRC INSPECTION REPORT 50-528/95-13; 50-529/95-13; 50-530/95-13

This refers to the inspection conducted by Mr. W. M. McNeill of this office on June 19-23, 1995. The inspection included a review of activities authorized for your Palo Verde Nuclear Generating Station, Units 1, 2, and 3, facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. The inspection examined the plant material condition and your followup on previous inspection findings. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

In your letter, dated August 23, 1994, in response to Violation 528/94-12; 529/94-12; 530/94-12, you disagreed with the second and third cases of the first example of the first violation. After review of the additional information, we concluded that the cases were valid. Our review also concluded that your corrective actions to the first case were sufficient to address the problems identified in the second and third cases. No additional NRC review of the first example listed in the violation is needed.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

*for* *San Barnes*  
Thomas P. Gwynn, Director  
Division of Reactor Safety
