Subject: Amendment Request, NRC license no. 21-35069-01

Good morning Mr. Carlson,

In a letter dated September 17, 2017, you requested to amend NRC license no. 21-35069-01 to release a location of use for unrestricted use and to add a new location of use. The request is available electronically from the NRC's Agencywide Documents Access and Management System (ADAMS) at accession no. ML17272A501.

After review of your request, additional information is needed to complete the review. As discussed with you on October 6, 2017, please provide the following:

A) Request to release a location of use for unrestricted use:

- 1) Describe the isotopes used, quantities, and the last date of use;
- 2) Provide history of any spills or leaking sources at the facility;
- 3) Please submit the facility survey map indicating all areas where the radiation readings and wipes were taken.

B) Request to add a new location of use:

- 1) Provide facility diagram describing the rooms and their purpose, room numbers (if applicable) as well as rooms/areas immediately above, below, and adjacent to the rooms of interest;
- 3) Provide dimensions for each room where radioactive material will be used;
- 2) Explain measures to secure radioactive material from an unauthorized access.

Please provide a written response in a signed and dated letter by October 10, 2017. You may email your response as a pdf document to Magdalena.Gryglak@nrc.gov.

Thank you

Magdalena R. Gryglak
