Dear Sirs:

**Subject: Palo Verde Nuclear Generating Station (PVNGS)
Units 1, 2, and 3
Docket Nos. STN 50-528/529/530
Schedule for Submitting Revision to Proposed
Amendment to Technical Specification 3/4.8.1.1,
A.C. Sources - Operating**

On November 6, 1996 APS submitted a proposed amendment to technical specification 3/4.8.1.1, A.C. Sources – Operating. The proposed technical specification amendment provided controls that would prevent a degraded switchyard voltage/double sequencing condition. On September 16, 1997, the APS staff met with the NRC staff to discuss the November 6, 1996 request for technical specification amendment. During the meeting, it was agreed that the proposed technical specification amendment needed to be revised. APS expects to submit the revision to the proposed technical specification amendment by November 30, 1998.

Please contact Mr. Scott Bauer at (602) 393-5978 if you have any questions or would like additional information regarding this matter.

Sincerely,

JML/SAB/RKR/mah
