

JUNE 11 1979

Docket Nos. 50-315
and 50-316

DOLAN
Mr. John Fillingimast, Vice President
Indiana and Michigan Electric Company
Indiana and Michigan Power Company
Post Office Box 18
Bowling Green Station
New York, New York 10004

Dear Mr. *DOLAN* Fillingimast:

SUBJECT: INFORMATION COPY OF REQUEST FOR ADDITIONAL INFORMATION
REGARDING WESTINGHOUSE SMALL BREAK LOCA ANALYSIS

As we discussed with you during our meeting on May 30, 1979, the NRC staff is evaluating certain aspects of the NRC licensing process in light of the Three Mile Island Unit 2 (TMI-2) accident of March 28, 1979. One of the aspects being addressed by the staff in its evaluation is the status of the models used in safety analyses, especially with regard to transients and small break LOCAs. Enclosed is a copy of an NRC letter, dated June 4, 1979, requesting information from your nuclear steam supply vendor, the Westinghouse Electric Corporation, regarding small break LOCA analyses and analysis methods. This enclosure is provided for your information.

It is our understanding that you are participating in this effort as it applies to your licensed power plants through an owners group. At some point in this effort we will require that you document the applicability of the results of these Westinghouse analyses to your plants. To that end, a copy of all correspondence to Westinghouse and the owners group on this matter will be provided to you and placed in our files on your specific plants.

Please contact P. D. O'Reilly, the staff's assigned project manager, for this matter, if you have any questions.

Sincerely,

Original Signed By

A. Schwencer, Chief *7 907240 547 MA 4*
