

MAY 21 1982

Docket Nos. 50-315  
and 50-316

LICENSEE: Indiana and Michigan Electric Company

FACILITIES: Donald C. Cook Nuclear Plant Unit Nos. 1 and 2

SUMMARY OF MEETING HELD ON APRIL 30, 1982 TO DISCUSS CONTINUED SAFE OPERATION OF D. C. COOK PLANT

Background

The meeting was held in room P-422 in the NRC headquarters at 7920 Norfolk Avenue, Bethesda, Maryland. Attendees are listed in Enclosure 1.

In a memo from R. L. Spessard to D. G. Eisenhut dated April 23, 1982, NRR was advised that the D. C. Cook Nuclear Plant Units 1 and 2 do not meet 10 CFR 50, Appendix R requirements. Region III requested technical assistance from NRR to evaluate the safety significance of the findings of the fire protection inspection of Cook plant conducted on April 12-16, 1982. NRR responded to that request with this expeditious meeting with the licensee.

Meeting Summary

The NRC position was stated as follows:

The Appendix R inspection conducted at the D. C. Cook Nuclear Plant on April 12-16, 1982, has raised questions about the continued safe operation of the plant should a fire occur in the cable vault. The licensee was asked to provide NRC with the basis and justification for continued safe operation.

R. S. Hunter replied that he did not know when the Cook plant would be in compliance with Appendix R, because he thought he knew what Appendix R meant and now he realizes that his interpretation was incorrect.

Mr. Hunter further stated that since he can not guarantee that a fire will not occur in the cable vault that concentrated short term effort was on fine tuning administrative procedures. Those procedures for hot and cold shut down were presented by the licensee but will not be discussed here because they are detailed in the licensee's letter to H. Denton dated May 4, 1982.

Mr. Hunter assured the NRC that IMEC is diligently addressing all of the questions associated with the findings of fire protection inspections conducted by Region III.

D. G. Eisenhut emphasized the concern of NRC over the safety of the plant and agreed with continued operation provided the licensee would respond to his specific direction.

R. S. Hunter stated that IMEC would respond to that specific direction.

D. G. Eisenhut directed R. S. Hunter of AEP to do the following:

1. Send a letter to NRC by COB May 3, 1982, which addresses D. C. Cook plant safety relative to fire protection as follows:
  - a. Recognition by the licensee of the problems and corrective action needed.
  - b. Basis for continued safe operation of the plant.
  - c. Describe a complete program to be implemented by June 4, 1982 which will provide equipment and trained personnel to achieve hot and cold shutdown of the plant if a fire occurs in the cable vault.
  - d. Describe a program for emergency lighting along with the schedule for completion.
  - e. Explain why there is no problem with oil collection.
  - f. Reassess whether D. C. Cook meets Appendix R and request an exemption.
2. Send a letter to NRC by COB May 10, 1982, which describes what the licensee will do to comply with the requirements of Appendix R to include but not be limited to the following:
  - a. Describe a long term program with schedule for meeting Appendix R.
  - b. Provide a list of systems and scope of work which deals specifically with hot and cold shutdown should a fire occur in the cable vault.
  - c. Explain what AEP/IMEC management is doing to expedite a NRC requirement which is over one year late.

Mr. Eisenhut emphasized again that the purpose of the meeting was to justify continued operations and the safety of the D. C. Cook Nuclear Plant.

Future Actions

Licensee submittals will be reviewed by NRC with further action to be determined by the results of these reviews and licensee responsiveness.

Target Dates

Response to NRC	May 3, 1982
Response to NRC	May 10, 1982
Short Term program in place (includes training, marking of equipment, and walkthrough)	June 4, 1982

10

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is essential for the proper management of the organization's finances and for ensuring compliance with applicable laws and regulations.

2. The second part of the document outlines the specific procedures that should be followed when recording transactions. This includes the use of standardized forms and the requirement that all entries be supported by appropriate documentation.

3. The third part of the document discusses the role of the accounting department in the overall financial management process. It highlights the department's responsibility for providing timely and accurate financial information to management and other stakeholders.

4. The fourth part of the document discusses the importance of regular audits and reviews of the financial records. It notes that these activities are necessary to identify any errors or irregularities and to ensure that the records are reliable and accurate.

5. The fifth part of the document discusses the importance of maintaining the confidentiality of financial information. It notes that this information is often sensitive and that its disclosure could have significant negative consequences for the organization.
