

FEB 03 1983

Docket Nos. 50-315
and 50-316

Indiana & Michigan Electric Company
ATTN: Mr. John Dolan
Vice President
Post Office Box 18
Bowling Green Station
New York, New York 10004

Gentlemen:

By application dated September 29, 1982, your Company requested that the Office of Nuclear Reactor Regulation (ONRR) review Technical Specifications (TS) for your Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2. The request relates to Item II.F.1.6 of NUREG-0737 (Containment Hydrogen Monitors). The request included a statement that payment of fees pursuant to 10 CFR 170 for these changes will be made as part of the fee to be levied for the issuance of TS changes required by NUREG-0737.

Based on information provided by the ONRR staff as a result of their preliminary review of your application, it has been determined that the review of this request will involve consideration of a single safety issue. Therefore, a Class III fee of \$4,000 is applicable for one unit and a Class I fee of \$400 is required for the other unit. It is requested that your Company remit a sum of \$4,400 to this office for your September 29, 1982 application. If the ONRR staff's final review of this application reveals that these fees are not correct, you will be notified and any necessary adjustments will be made.

Licensees are required pursuant to 10 CFR 170 to pay fees for applications as they are filed. This includes applications for TS changes and other requested approvals required as a result of NUREG-0737.
