Docket Nos. 50-315
and 50-316

Indiana & Michigan Electric Company
ATTN: Mr. John Dolan
Vice President
Post Office Box 18
Bowling Green Station
New York, New York 10004

Gentlemen:

We have received a copy of your application dated February 28, 1983 (AEP:NRC:745B), which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application requested changes to the D. C. Cook Unit Nos. 1 and 2 Technical Specifications to permit storage of Westinghouse 15x15 optimized fuel in the D. C. Cook Spent Fuel Pool. Fees pursuant to 10 CFR 170.22 were not remitted with this application inasmuch as you consider it to be a part of the Unit No. 1 cycle 8 reload application dated October 18, 1982, for which a Class III fee was paid.

Based on information provided by the ONRR staff as a result of their preliminary reviews of your cycle 8 reload for Unit No. 1 and the February 28, 1983 spent fuel pool storage request, it has been determined that the spent fuel pool changes will involve consideration of a separate single safety issue. On this basis, Classes III and I fees are due for your spent fuel pool storage changes. Therefore, it is requested that your Company remit a sum of \$4,400 to our office. If the ONRR staff's final review of the reload and spent fuel pool changes reveals that the two Class III and the Class I fees are not correct for them, you will be notified and any necessary adjustments will be made.

Sincerely,

Original Signed by
