TAMBLING

Dear Mr. Dolan:

The TMI Action Item II.B.2.2 required plant modifications and a design review of plant shielding requirements for access to vital areas. We have now completed our review of the D. C. Cook Nuclear Plant shielding for vital area access and our Safety Evaluation is enclosed for your information. We have concluded that the modifications that were required have been completed and are acceptable. This completes our review of the TMI Action Item II.B.2 for your facilities.

Sincerely,

Original signed by
S. A. Varga

Steven A. Varga, Chief
Operating Reactors Branch #1
Division of Licensing

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by proper documentation and that the books should be kept up-to-date at all times.

In the second section, the author details the various methods used to collect and analyze data. This includes the use of statistical techniques to identify trends and patterns in the data. The author also discusses the challenges of data collection and how to overcome them.

The third part of the document focuses on the interpretation of the results. It explains how to draw meaningful conclusions from the data and how to communicate these findings effectively. The author provides several examples of how to present data in a clear and concise manner.

Finally, the document concludes with a summary of the key points discussed. It reiterates the importance of accuracy and thoroughness in all aspects of the data analysis process. The author also offers some final thoughts on the future of data analysis and the role of technology in this field.
