The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 71 to Facility Operating License No. DPR-58, and Amendment No. 53 to Facility Operating License No. DPR-74 issued to Indiana and Michigan Electric Company (the licensee), which revised Technical Specifications for operation of Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2 (the facilities) located in Berrien County, Michigan. The amendments are effective as of the date of issuance.

The amendment revise the Technical Specifications to reflect revised surveillance requirements for safety-related snubbers. These amendments also add a section 4.0.5 to the Unit 1 Technical Specifications on surveillance requirements for inservice inspection and testing of components and deletes a portion of section 4.0.4 in Unit 1 and 4.0.5.a.1 in Unit 2, which are no longer applicable. These latter changes are made to clarify the Technical Specifications and make them consistent with Standard Technical Specification requirements.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate
