

JUL 11 1983

MEMORANDUM FOR: Karl V. Seyfrit, Chief
Reactor Operations Analysis Branch
Office for Analysis and Evaluation
of Operational Data

AEOD/E316

FROM: Dorothy J. Zukor
Reactor Systems 2
Reactor Operations Analysis Branch, AEOD

SUBJECT: FROZEN ICE CONDENSER INTERMEDIATE DECK DOORS

A number of events have occurred at Cook and Sequoyah where the intermediate deck doors were frozen shut. Most of the problems occurred while the plant was new and have decreased as operational experience was gained. Since recent failures have consisted of isolated cases of one or two doors freezing shut, the ability of the ice condenser to perform its safety function had not been jeopardized. No further AEOD action is necessary.
