Dear Mr. Lundvall:

This is in response to your letter of January 4, 1983 concerning qualifications of shift technical advisors (STAs) at Calvert Cliffs Units 1 and 2. By our letter of July 9, 1982 we stated that BG&E's STA training program was acceptable. This finding was partially based upon the understanding that, although some individuals to be trained as STAs did not have a bachelor degree or the equivalent in a scientific or engineering discipline, they were highly experienced senior reactor operators (SROs). With regard to the four individuals referenced in your letter of January 4, 1983 who had been promoted to SRO status prior to our letter of July 9, 1982, it is our position that these individuals can be trained as STAs provided that they have sufficient experience. We would be willing to review the qualifications of these individuals for acceptability as candidates for your STA training program. It is our position, however, that STA candidates, other than the four individuals referenced in your January 4, 1983 letter, have a bachelor degree or the equivalent in a scientific or engineering discipline pending final determination of such requirements by the NRC.

Sincerely,

Original signed by  
Robert A. Clark  
Robert A. Clark, Chief

This is in response to your letter of January 4, 1983 concerning qualifications of shift technical advisors (STAs) at Calvert Cliffs Units 1 and 2. By our letter of July 9, 1982 we stated that BG&E's STA training program was acceptable. This finding was partially based upon the understanding that, although some individuals to be trained as STAs did not have a bachelor degree or the equivalent in a scientific or engineering discipline, they were highly experienced senior reactor operators (SROs). With regard to the four individuals referenced in your letter of January 4, 1983 who had been promoted to SRO status prior to our letter of July 9, 1982, it is our position that these individuals can be trained as STAs provided that they have sufficient experience. As a general guideline, sufficient experience for these non-degreed individuals can be considered to be a minimum of five (5) years experience as a licensed control room operator. We would be willing, however, to review the qualifications of individuals with less than five (5) years experience for acceptability as candidates for your STA training program. It is our position, however, that STA candidates, other than the four individuals referenced in your January 4, 1983 letter, have a bachelor degree or the equivalent in a scientific or engineering discipline pending final determination of such requirements by the NRC.

Sincerely,

Robert A. Clark, Chief
