Mr. John Dolan, Vice President
Indiana and Michigan Electric Company
c/o American Electric Power Service Corporation
1 Riverside Plaza
Columbus, Ohio 43216

Dear Mr. Dolan:

On October 12, 1984, the Indiana and Michigan Electric Company submitted the inservice test program for pumps and valves for the Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2. From our preliminary review of your program, we find it acceptable for implementation until we have completed our more formal review in about eight months. The surveillance requirements of the Technical Specifications should continue to be met. If there are any conflicts in these requirements and your proposed program, they should be brought to our attention for resolution during our review of your program.

If there are any question in this matter, please let us know.
