Donald C. Cook Nuclear Plant Unit Nos. 1 and 2  
Docket Nos. 50-315 and 50-316  
License Nos. DPR-58 and DPR-74  
GENERIC LETTER 83-28, ADDITIONAL INFORMATION  
ON ITEMS 3.1.3 AND 3.2.3

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

Pursuant to discussions with your staff, we have reviewed the Donald C. Cook Technical Specifications (T/Ss) for Units 1 and 2 for post-maintenance testing requirements that degrade safety. This review excluded those T/Ss that specify use of various codes and standards as the basis for surveillance testing.

As a result of this review, we have identified those T/Ss directly specifying post-maintenance testing of the diesel generators as a potential contributor to reduced diesel generator reliability and hence to the degradation of overall plant safety. However, as mentioned in our submittals AEP:NRC:0838B and AEP:NRC:0838H (dated March 30, 1984 and April 10, 1985, respectively), internal efforts, as well as industry-wide efforts, are currently underway to modify diesel generator technical specifications, and thus minimize problems in this area.

This document has been prepared following Corporate procedures which incorporate a reasonable set of controls to insure its accuracy and completeness prior to signature by the undersigned.

Very truly yours,

  
M. P. Alexich  
Vice President
