

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D. C. 20555

JAN 15 1986

Docket Nos.: 50-315
and 50-316

Mr. John Dolan, Vice President
Indiana and Michigan Electric Company
c/o American Electric Power Service Corporation
1 Riverside Plaza
Columbus, Ohio 43216

Dear Mr. Dolan:

Subject: Indiana and Michigan Electric Company Request for Approval to Use
ASME Code Section XI, 1983 Edition with Summer 1983 Addenda for the
ISI/IST Program for the Donald C. Cook Nuclear Plant, Units 1 and 2

By letter dated December 10, 1985, the Indiana and Michigan Electric Company (IMEC) requested approval to use the provisions of ASME Code Section XI, 1983 Edition with Summer 1983 Addenda for the ISI/IST program for the Donald C. Cook Nuclear Plant. The use of this edition, and addenda would begin with the second 10 year program consistent with the schedule approved by the Exemption dated November 29, 1984, as transmitted to you by letter dated December 18, 1984. The conditions of the Exemption are unchanged; the IMEC request is for an interpretation of the provisions of 10 CFR 50.55a(g).

The common start date for Units 1 and 2 for the second ten year ISI/IST program is July 1, 1986. According to the requirements, in part, of 10 CFR 50.55a(g)(4)(ii), the ISI/IST programs... "conducted during successive 120-month inspection intervals shall comply with the requirements of the latest edition and addenda of the Code incorporated by reference in paragraph (b) of this section 12 months prior to the start of the 120-month inspection interval...." This would mean that, as a minimum, your new program should comply with the 1980 Edition of the Code. However, while the regulations clearly require that successive programs be updated to approved edition and addenda of the Code, a 12 month grace period is also allowed so that the licensees can begin to update their programs sufficiently in advance of submittal without having to make last minute changes should a new edition or addenda be approved by the NRC. Accordingly, we see no inconsistency with the 10 CFR 50.55a(g) requirements if a licensee elects on its own to forego a portion of the 12 month grace period and to upgrade a 120-month program to later editions and addenda that have been approved by the NRC. The IMEC request to update the second 10 year program for D. C. Cook to the provision of the 1983 Edition with Summer 1983 Addenda of the ASME Code Section XI meets the requirements of the regulations. We will review

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is essential for the proper management of the organization's finances and for ensuring compliance with applicable laws and regulations.

2. The second part of the document outlines the specific procedures that should be followed when recording transactions. This includes the use of standardized forms and the requirement that all entries be supported by appropriate documentation.

3. The third part of the document discusses the role of the accounting department in the overall financial management process. It highlights the department's responsibility for providing timely and accurate financial information to management and other stakeholders.

4. The fourth part of the document addresses the issue of internal controls. It stresses the need for a robust system of internal controls to prevent and detect errors and fraud, and to ensure the integrity of the financial reporting process.

5. The fifth part of the document discusses the importance of regular audits. It notes that audits are a critical component of the financial management process, as they provide an independent assessment of the organization's financial health and the effectiveness of its internal controls.

6. The sixth part of the document discusses the importance of transparency and communication in financial management. It emphasizes the need for clear and concise financial reporting, and for the timely disclosure of financial information to all relevant parties.
