

29 SEP 1986

Docket Nos.: 50-315
and 50-316

Mr. John Dolan, Vice President
Indiana and Michigan Electric Company
c/o American Electric Power Service Corporation
1 Riverside Plaza
Columbus, Ohio 43216

Dear Mr. Dolan:

SUBJECT: EMERGENCY RESPONSE CAPABILITY (ERF APPRAISAL) FOR DONALD C. COOK
NUCLEAR PLANT, UNITS 1 AND 2

The NRC licensing staff has reviewed the status of your Emergency Response Facilities (ERF) which includes the Technical Support Center, Operations Staging Area, and Emergency Operations Facility. These are TMI Action Items II.A.1.2. We are reviewing the Meteorological Data Upgrade (TMI Action Item II.A.2.2) separately.

By confirmatory orders for both units dated June 12, 1985 as modified by letter dated December 31, 1985, the NRC confirmed your commitments to implement certain post-TMI related items set forth in Supplement 1 to NUREG-0737, "Requirements for Emergency Response Capability." The orders as modified confirm that the Emergency Response Facilities were complete except for the Safety Parameter Display System (SPDS) and Regulatory Guide 1.97 Instrumentation. The staff's decision on these outstanding items as well as certain other requested exceptions (i.e., meteorological data available in the facilities and results of the Detailed Control Room Design Reviews) have been or continue to be part of separate actions.

The Indiana and Michigan Electric Company (IMEC) letter dated September 8, 1986 addresses these separate actions. We also realize that certain Emergency Operating Procedures may require revision as these actions are completed. Except for the outstanding items, the ERF will be audited against the staff's requirements by NRC Region III in an ERF Appraisal. This will be arranged by Region III and may include any of the outstanding items if the NRC review and IMEC implementation is complete by the time of the appraisal.

Sincerely,

8610080301 860927
